Material Safety Data Sheet

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY/UNDERTAKING

Product Name: TOPSol A100
Product Uses: Industrial solvent
Manufacturer/Supplier: TOP Solvent Company Limited
555/1 Energy Complex Building A, 11th Floor
Viphavadi Rangsit Road Chatuchak, Bangkok 10900 Thailand
Telephone: +66 2 299 0003 or +66 2 797 2993
Fax: +66 2 797 2983
Emergency Telephone Number: +66 2 299 0003 [working hours] or +66 38 683090 ext.103 [out of working hours]
Other Information: TOPSol is a trademark owned by TOP Solvent Company Limited

2. HAZARDS IDENTIFICATION

GHS classification:
- Flammable liquids, Category 3
- Skin irritation, Category 3
- Aspiration hazard, Category 1
- Specific target organ toxicity (single exposure), Category 3
  (Narcotic effects, Respiratory tract)
- Carcinogenicity, Category 2
- Aquatic toxicity (acute), Category 2
- Aquatic toxicity (chronic), Category 2

GHS label elements
Symbol(s):

Signal words: Danger
GHS Hazard statements:
Health hazards: H304 May be fatal if swallowed and enters airways.
Material Safety Data Sheet

H316 Causes mild skin irritation.
H335 May cause respiratory irritation.
H336 May cause drowsiness or dizziness.
H351 Suspected of causing cancer.

Environmental hazards :
H401 Toxic to aquatic life.
H411 Toxic to aquatic life with long lasting effects.

GHS Precautionary statements

Prevention :
P210 Keep away from heat/spark/open flames/hot surfaces, no smoking.
P233 Keep container tightly closed.
P240 Ground/bond container and receiving equipment.
P241 Use explosion-proof electrical/ventilating/lighting equipment.
P242 Use only non-sparking tools.
P243 Take precautionary measures against static discharge.
P261 Avoid breathing dust/fume/vapors/spray.
P271 Use only out doors or in a well-ventilated area.
P273 Avoid release to the environment.
P280 Wear protective gloves/protective clothing/eye protection/face protection.

Response :
P301+P310 IF SWALLOWED: Immediately call a POISONCENTER or doctor/physician.
P303+P361+P353 IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower.
P304+P340 IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.
P312 Call a POISON CENTER or doctor/physician if you feel unwell.
P331 Do NOT induce vomiting.
P332+P313 If skin irritation occurs: Get medical advice/attention.
P370+P378 In case of fire: Use appropriate media for extinction.
P391 Collect spillage.

Storage :
P403+P235 Store in a well-ventilated place. Keep cool.
P233 Keep container tightly closed.
P405 Store locked up.

Disposal :
P501 Dispose of contents and container to appropriate waste site or reclaimer in accordance with local and national
Material Safety Data Sheet

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical identity: Solvent naphtha (petroleum), light aromatics
CAS No.: 64742-95-6
EINECS No.: 265-199-0

<table>
<thead>
<tr>
<th>Chemical name</th>
<th>CAS no.</th>
<th>Conc.</th>

</thead>
<tbody>
<tr>
<td>Solvent naphtha (petroleum), light aromatics</td>
<td>64742-95-6</td>
<td>100 %</td>
</tr>
</tbody>
</table>

Further information: Contains Cumene < 5%

4. FIRST AID MEASURES

General information: Not expected to be health hazard when used under normal conditions
Inhalation: Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.
Skin contact: Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available.
Eye contact: Flush eyes with water while holding eyelids open. Rest eyes for 30 minutes. If redness, burning, blurred vision, or swelling persist, transport to the nearest medical facility for additional treatment.
Ingestion: If swallowed, do not induce vomiting: transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101°F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing.

Notes to physicians
Most Important symptoms/effects: Respiratory irritation signs and symptoms may include a temporary burning sensation of the nose and throat,
Material Safety Data Sheet

acute & delayed coughing, and/or difficulty breathing.
Breathing of high vapour concentrations may cause central nervous system (CNS) depression resulting in dizziness, lightheadedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness and death.
Defatting dermatitis signs and symptoms may include a burning sensation and/or a dried/cracked appearance. Auditory system effects may include temporary hearing loss and/or ringing in the ears.

Immediate medical attention and special treatment: Potential for chemical pneumonitis. Call a doctor or poison control center for guidance. Causes central nervous system depression. Dermatitis may result from prolonged or repeated exposure.

5. FIRE FIGHTING MEASURES

Clear fire area of all non-emergency personnel.

Extinguishing media: Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only. Do not discharge extinguishing waters into the aquatic environment.

Unsuitable extinguishing media: Do not use water in a jet.

Specific hazards arising from substance or mixture: Carbon monoxide may be evolved if incomplete combustion occurs. Will float and can be reignited on surface water. The vapor is heavier than air, spreads along the ground and distant ignition is possible.

Advice for fire fighters: Wear full protective clothing and self-contained breathing apparatus.

Additional information: Keep adjacent containers cool by spraying with water.

6. ACCIDENTAL RELEASE MEASURES

Observe all relevant local and international regulations.

Personal precautions, protective equipment: Avoid contact with spilled or released material. Immediately remove all contaminated clothing. For
Material Safety Data Sheet

and emergency procedures

guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. For guidance on disposal of spilled material see Chapter 13 of this Material Safety Data Sheet.

Environmental precautions

Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Use appropriate containment (of product and fire fighting water) to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. Attempt to disperse the vapor or to direct its flow to a safe location for example by using fog sprays. Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Monitor area with combustible gas indicator.

Methods and material for containment and clean Up

For small liquid spills (< 1 drum), transfer by mechanical means to a labelled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

Additional advice

See Chapter 13 for information on disposal. Notify authorities if any exposure to the general public or the environment occurs or is likely to occur.

7. HANDLING AND STORAGE

General Precautions

Avoid breathing vapours or contact with material. Only use in well ventilated areas. Wash thoroughly after handling. On guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. Use the information in this data sheet
Precautions for Safe Handling: Extinguish any naked flames. Do not smoke. Remove ignition sources. Avoid sparks. Avoid contact with skin, eyes, and clothing. Electrostatic charges may be generated during pumping. Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Restrict line velocity during pumping in order to avoid generation of electrostatic discharge (<= 1 m/sec until fill pipe submerged to twice its diameter, then <= 7 m/sec). Avoid splash filling. Do NOT use compressed air for filling, discharging, or handling operations.

Conditions for safe storage: Must be stored in a diked (bunded) area. Bulk storage tanks should be diked (bunded). Keep away from flammables, oxidizing agents, and corrosives. Storage Temperature: Ambient.

Product transfer: Keep containers closed when not in use. Do not use compressed air for filling, discharging or handling.

Recommended materials: For containers, or container linings use mild steel, stainless steel. For container paints, use epoxy paint, zinc silicate paint.

Unsuitable materials: Avoid prolonged contact with natural, butyl or nitrile rubbers.

Container advice: Containers, even those that have been emptied, can contain explosive vapors. Do not cut, drill, grind, weld or perform similar operations on or near containers.

Other advice: Ensure that all local regulations regarding handling and storage facilities are followed.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure Limits:
In the absence of occupational exposure standards for this product, it is recommended that the following are adopted.
## Material Safety Data Sheet

### Material name | Source | Type | Limit/Standard | Note
---|---|---|---|---
Solvent naphtha (petroleum), light aromatics | (CEFIC-HSPA) methodology | TWA | 100 ppm | Total hydrocarbons
Cumene | ACGIH | TWA | 50 ppm |

### Additional Information
- Wash hands before eating, drinking, smoking and using the toilet.

### Appropriate engineering controls
- The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate explosion-proof ventilation to control airborne concentrations below the exposure guidelines/limits. Eye washes and showers for emergency use.

### Individual protection measures
- Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

### Eye protection
- Monogoggles (EN166)
- Chemical splash goggles (chemical monogoggles).

### Hand protection
- Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739, AS/NZS:2161) made from the following materials may provide suitable chemical protection:
  - Longer term protection: Nitrile rubber gloves
  - Incidental contact/Splash protection: PVC or neoprene rubber gloves
- Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.

### Body protection
- Use protective clothing which is chemical resistant to this material. Safety shoes and boots should also be chemical resistant.

### Respiratory protection
- If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment
suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for organic gases and vapors [boiling point > 65 °C (149 °F)] meeting EN141. Where air-filtering respirators are unsuitable (e.g., airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus.

**Thermal hazards**
- Not applicable.

**Monitoring Methods**
- Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

**Environment exposure controls**
- Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapor.

**TOPSol A100**

Version 2.2

Effective Date 18-September-2015

Material Safety Data Sheet
Material Safety Data Sheet

**Evaporation rate**
(nBuAc=1) : < 1.0 (ASTM D 3539, nBuAc=1)

**Volatile organic carbon content** : 90% (EC/1999/13)

### 10. STABILITY AND REACTIVITY

**Chemical Stability**
: Stable under normal conditions of use.

**Possibility of Hazardous Reactions**
: Data not available

**Conditions to avoid**
: Avoid heat, sparks, open flames and other ignition sources.

**Materials to avoid**
: Strong oxidizing agents.

**Hazardous decomposition products**
: Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases, including carbon monoxide, carbon dioxide and other organic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

### 11. TOXICOLOGICAL INFORMATION

**Basis for assessment**
: Information given is based on product testing, and/or similar products, and/or components.

**Routes of exposure**
: Exposure may occur via inhalation, ingestion, skin absorption, skin or eye contact, and accidental ingestion.

**Acute oral toxicity**
: May be harmful if swallowed. LD50 > 2000 - <= 5000 mg/kg, Rat

**Acute dermal toxicity**
: Low toxicity. LD50 > 2000 mg/kg, Rabbit

**Acute inhalation toxicity**
: Low toxicity : LC50 is greater than near-saturated vapor concentration. High concentrations may cause central nervous system depression resulting in headaches, dizziness and nausea.

**Skin irritation**
: Causes mild skin irritation. Prolonged/repeated contact may cause defatting of the skin which can lead to dermatitis.

**Serious eye damage/irritation**
: Expected to be non-irritating to eye.

**Respiratory Irritation**
: Inhalation of vapors or mists may cause irritation to the respiratory system.

### 12. ECOLOGICAL INFORMATION

**Basis for assessment**
Incomplete ecotoxicological data are available for this product. The information given below is based partly on a knowledge of the components and the ecotoxicology of similar products.

**Acute Toxicity**

<table>
<thead>
<tr>
<th>Organ</th>
<th>Toxicity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fish</td>
<td>Toxic: LC/EC/IC $\leq$ 1-10 mg/l</td>

<td>Microorganisms</td>
<td>Harmful: LC/EC/IC $\leq$ 10-100 mg/l</td>
</tr>
</tbody>
</table>

**Persistence and degradability**
Expected to be readily biodegradable. Oxidizes rapidly by photo-chemical reactions in air.

**Bioaccumulative potential**
Does not have the potential to bioaccumulate significantly.

**Mobility**
Adsorbs to soil and has low mobility. Floats on water.

### 13. DISPOSAL CONSIDERATIONS

**Material Disposal**
Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and
Material Safety Data Sheet

physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Do not dispose into the environment, in drains or in water courses. Waste product should not be allowed to contaminate soil or water.

**Container Disposal**: Drain container thoroughly. After draining, vent in a safe place away from sparks and fire. Residues may cause an explosion hazard. Do not, puncture, cut, or weld uncleaned drums. Send to drum recoverer or metal reclaimer.

**Local Legislation**: Disposal should be in accordance with applicable regional, national, and local laws and regulations. Local regulations may be more stringent than regional or national requirements and must be complied with.

---

### 14. TRANSPORT INFORMATION

**Land (as per ADR classification): Regulated**

- **Class**: 3
- **Packing group**: III
- **Hazard identification no.**: 30
- **UN No.**: 1268
- **Danger label (primary risk)**: 3
- **Proper shipping name**: PETROLEUM DISTILLATES, N.O.S.
- **Environmentally hazardous**: Yes

**IMDG**

- **Identification number**: UN 1268
- **Proper shipping name**: PETROLEUM DISTILLATES, N.O.S.
- **Class / Division**: 3
- **Packing group**: III
- **Marine pollutant**: Yes

**IATA (Country variations may apply)**

- **UN no.**: 1268
- **Proper shipping name**: Petroleum distillates, n.o.s.
- **Class / Division**: 3
Material Safety Data Sheet

Packing group III

SEA (Annex II of MARPOL 73/78 and the IBC code)
Pollution category Annex I
Ship type Annex I or Double hull vessels with carriage of oil certification.
Product name Solvent Naphtha
Special precaution Refer to chapter 7, Handling & storage for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

15. REGULATORY INFORMATION

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Chemical Inventory Status
DSL : Listed.
TSCA : Listed.
EINECS : Listed. 265-199-0
KECI (KR) : Listed.
PICCS (PH) : Listed.

16. OTHER INFORMATION

Uses and Restrictions : Industrial Solvent.
Restricted to professional users.

MSDS Distribution : The information in this document should be made available to all who may handle the product

Disclaimer : This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product.
