TOPSol A150ND

Version 2.2
Effective Date 18-September-2015

Material Safety Data Sheet

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY/UNDERTAKING

Product Name: TOPSol A150ND
Product Uses: Industrial solvent
Manufacturer/Supplier: TOP Solvent Company Limited
555/1 Energy Complex Building A, 11th Floor
Viphavadi Rangsit Road Chatuchak, Bangkok 10900
Thailand
Telephone: +66 2 299 0003 or +66 2 797 2993
Fax: +66 2 797 2983
Emergency Telephone Number: +66 2 299 0003 [working hours] or +66 38 683090 ext.103 [out of working hours]
Other Information: TOPSol is a trademark owned by TOP Solvent Company Limited

2. HAZARDS IDENTIFICATION

GHS classification:
- Flammable liquids, Category 4
- Specific target organ toxicity (single exposure), Category 3 (Narcotic effects)
- Aspiration hazard, Category 1
- Aquatic toxicity (acute), Category 2
- Aquatic toxicity (chronic), Category 2

GHS label elements
Symbol(s):

Signal words: Danger
GHS Hazard statements:
- Physical hazards: H227 Combustible liquid.
- Health hazards: H304 May be fatal if swallowed and enters airways.
  H316 Causes mild skin irritation.
  H336 May cause drowsiness or dizziness.
- Environmental hazards: H401 Toxic to aquatic life
GHS Precautionary statements

Prevention:
P261 Avoid breathing dust/fume/vapors/spray.
P271 Use only out doors or in a well-ventilated area.
P273 Avoid release to the environment.

Response:
P304+P340 IF INHALED remove to fresh air and keep at rest in a position comfortable for breathing.
P312 Call a POISON CENTRE or doctor/physician if you fell unwell.
P301+P310 IF SWALLOWED, immediately call a POISON CENTRE or doctor/physician.
P331 DO NOT induce vomiting.

Storage:
P403+P233 Store in a well-ventilated place. Keep cool.
P233 Keep container tightly closed.
P405 Store locked up.

Disposal:
P501 Dispose of contents and container to appropriate waste site or reclaimer in accordance with local and national regulations.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical identity: Solvent naphtha (petroleum), heavy aromatics
CAS No.: 64742-94-5
EINECS No.: 265-198-5

GHS classification of components

<table>
<thead>
<tr>
<th>Chemical name</th>
<th>CAS no.</th>
<th>Conc.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solvent naphtha (petroleum), heavy aromatics</td>
<td>64742-94-5</td>
<td>100 %</td>
</tr>
</tbody>
</table>

Further information: Contains Naphthalene < 1%, 1,2,4-Trimethylbenzene < 15%

4. FIRST AID MEASURES

General information: Not expected to be health hazard when used under normal conditions
Inhalation: Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional
5. FIRE FIGHTING MEASURES

Clear fire area of all non-emergency personnel.
TOPSol A150ND

Material Safety Data Sheet

Extinguishing media
Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only. Do not discharge extinguishing waters into the aquatic environment.

Unsuitable extinguishing media
Do not use water in a jet.

Specific hazards arising from substance or mixture
Carbon monoxide may be evolved if incomplete combustion occurs. Will float and can be reignited on surface water. The vapor is heavier than air, spreads along the ground and distant ignition is possible.

Advice for fire fighters
Wear full protective clothing and self-contained breathing apparatus.

Additional information
Keep adjacent containers cool by spraying with water.

6. ACCIDENTAL RELEASE MEASURES

Observe all relevant local and international regulations.

Personal precautions, protective equipment and emergency procedures
Avoid contact with spilled or released material. Immediately remove all contaminated clothing. For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. For guidance on disposal of spilled material see Chapter 13 of this Material Safety Data Sheet.

Environmental precautions
Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Use appropriate containment (of product and fire fighting water) to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. Attempt to disperse the vapor or to direct its flow to a safe location for example by using fog sprays. Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Monitor area with combustible gas indicator.

Methods and material for containment and clean Up
For small liquid spills (< 1 drum), transfer by mechanical means to a labelled, sealable container for product recovery or safe disposal. Allow residues to evaporate or
soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.
For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

Additional advice: See Chapter 13 for information on disposal. Notify authorities if any exposure to the general public or the environment occurs or is likely to occur.

7. HANDLING AND STORAGE

General Precautions: Avoid breathing vapours or contact with material. Only use in well ventilated areas. Wash thoroughly after handling. On guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

Precautions for Safe Handling: Extinguish any naked flames. Do not smoke. Remove ignition sources. Avoid sparks. Avoid contact with skin, eyes, and clothing. Electrostatic charges may be generated during pumping. Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Restrict line velocity during pumping in order to avoid generation of electrostatic discharge (<= 1 m/sec until fill pipe submerged to twice its diameter, then <= 7 m/sec). Avoid splash filling. Do NOT use compressed air for filling, discharging, or handling operations.

Conditions for safe storage: Must be stored in a diked (bunded) area. Bulk storage tanks should be diked (bunded). Keep away from flammables, oxidizing agents, and corrosives. Storage Temperature: Ambient.
Product transfer: Keep containers closed when not in use. Do not use compressed air for filling, discharging or handling.

Recommended materials: For containers, or container linings use mild steel, stainless steel. For container paints, use epoxy paint, zinc silicate paint.

Unsuitable materials: Avoid prolonged contact with natural, butyl or nitrile rubbers.

Container advice: Containers, even those that have been emptied, can contain explosive vapors. Do not cut, drill, grind, weld or perform similar operations on or near containers.

Other advice: Ensure that all local regulations regarding handling and storage facilities are followed.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure Limits:
In the absence of occupational exposure standards for this product, it is recommended that the following are adopted.

<table>
<thead>
<tr>
<th>Material name</th>
<th>Source</th>
<th>Type</th>
<th>Limit/Standard</th>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>RCP-Aromatic Solvent 180-215</td>
<td>HSPA OELs</td>
<td>TWA (8h)</td>
<td>100 mg/m³</td>
<td></td>
</tr>
<tr>
<td>Naphthalene</td>
<td>ACGIH</td>
<td>TWA (STEL)</td>
<td>10 ppm. 15 ppm.</td>
<td>Can be absorbed through skin</td>
</tr>
<tr>
<td>1,2,4-Trimethylbenzene</td>
<td>ACGIH</td>
<td>TWA</td>
<td>25 ppm.</td>
<td></td>
</tr>
</tbody>
</table>

Additional Information: Wash hands before eating, drinking, smoking and using the toilet.

Appropriate engineering controls: The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate explosion-proof ventilation to control airborne concentrations below the exposure guidelines/limits. Eye washes and showers for emergency use.

Individual protection: Personal protective equipment (PPE) should meet
Material Safety Data Sheet

**measures**

Recommended national standards. Check with PPE suppliers.

**Eye protection**

- Monogoggles (EN166)
- Chemical splash goggles (chemical monogoggles).

**Hand protection**

Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739, AS/NZS:2161) made from the following materials may provide suitable chemical protection:

- Longer term protection: Nitrile rubber gloves
- Incidental contact/Splash protection: PVC or neoprene rubber gloves

Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.

**Body protection**

Use protective clothing which is chemical resistant to this material. Safety shoes and boots should also be chemical resistant.

**Respiratory protection**

If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for organic gases and vapors [boiling point >65 °C (149 °F)] meeting EN141. Where air-filtering respirators are unsuitable (e.g., airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus.

**Thermal hazards**

Not applicable.

**Monitoring Methods**

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

**Environment exposure controls**

Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapor.
9. PHYSICAL AND CHEMICAL PROPERTIES

**Appearance**: Colorless. Liquid.
**Odor**: Aromatic
**Odor threshold**: Data not available
**pH**: Not applicable.
**Boiling Range**: 180 - 200 °C / 356 - 392 °F
**Pour point**: Typical -20 °C / -4 °F
**Flash point**: Typical 63 °C / 145 °F (ASTM D-93, PMCC)
**Explosion/ Flammability limits in air**: 0.6 - 6 %(V)
**Auto-ignition temperature**: 449 - 510 °C / 840 - 950 °F (ASTM E-659)
**Vapour pressure**: Typical 150 Pa at 20 °C / 68 °F
**Specific gravity**: 0.883 at 15 °C / 60 °F
**Density**: Typical 883 kg/m³ at 15 °C / 60 °F (ASTM D-4052)
**Water solubility**: Insoluble.
**n-octanol/water partition coefficient (log Pow)**: 3.7 - 4.2
**Decomposition Temp**: Stable under normal condition of use.
**Vapor density (air=1)**: 4.8
**Evaporation rate (nBuAc=1)**: 0.1 (ASTM D 3539, nBuAc=1)
**Volatile organic carbon content**: 90 % (EC/1999/13)

10. STABILITY AND REACTIVITY

**Reactivity**: Not applicable
**Stability**: Stable under normal conditions of use.
**Possibility of Hazardous Reactions**: Data not available
**Conditions to avoid**: Avoid heat, sparks, open flames and other ignition sources.
**Materials to avoid**: Strong oxidizing agents.
**Hazardous decomposition products**: Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases, including carbon monoxide, carbon dioxide and other organic compounds will be evolved when this...
material undergoes combustion or thermal or oxidative degradation.

## 11. TOXICOLOGICAL INFORMATION

<table>
<thead>
<tr>
<th>Basis for assessment</th>
<th>Routes of exposure</th>
<th>Acute oral toxicity</th>
<th>Acute dermal toxicity</th>
<th>Acute inhalation toxicity</th>
<th>Skin irritation</th>
<th>Serious eye damage/irritation</th>
<th>Respiratory Irritation</th>
<th>Sensitization</th>
<th>Aspiration Hazard</th>
<th>Germ cell mutagenicity</th>
<th>Carcinogenicity</th>
<th>Reproductive and Developmental toxicity</th>
<th>Specific target organ toxicity-single exposure</th>
<th>Specific target organ toxicity-repeated exposure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Information given is based on product testing, and/or similar products, and/or components.</td>
<td>Exposure may occur via inhalation, ingestion, skin absorption, skin or eye contact, and accidental ingestion.</td>
<td>Low toxicity: LD50 &gt; 5000 mg/kg, Rat</td>
<td>Low toxicity.</td>
<td>Expected to be low toxicity if inhaled.</td>
<td>Not irritating to skin.</td>
<td>Not irritating to eye.</td>
<td>Inhalation of vapors or mists may cause irritation to the respiratory system.</td>
<td>Not a skin sensitizer.</td>
<td>Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal.</td>
<td>Not mutagenic.</td>
<td>Limited evidence of carcinogenic effect. (Naphthalene)</td>
<td>Not expected to impair fertility</td>
<td>Causes foetotoxicity in animals at doses which are maternally toxic.</td>
<td>May cause drowsiness or dizziness</td>
</tr>
</tbody>
</table>

## 12. ECOLOGICAL INFORMATION

| Basis for assessment | Incomplete ecotoxicological data are available for this product. The information given below is based partly on a knowledge of the components and the ecotoxicology of similar products. |
TOPSol A150ND
Version 2.2
Effective Date 18-September-2015

Material Safety Data Sheet

Acute Toxicity
- **Fish**
  - Toxic: \(1 \leq \text{LC/EC/IC50} \leq 10 \text{ mg/l}\)
- **Aquatic Invertebrates**
  - Toxic: \(1 \leq \text{LC/EC/IC50} \leq 10 \text{ mg/l}\)
- **Algae**
  - Toxic: \(1 \leq \text{LC/EC/IC50} \leq 10 \text{ mg/l}\)
- **Microorganisms**
  - Expected to be harmful: \(\text{LL/EL/IL} \geq 10 - \leq 100 \text{ mg/l}\)

Chronics Toxicity
- **Fish**
  - NOEC/NOEL expected to be \(>0.1 - \leq 1.0 \text{ mg/l}\) (based on modeled data)
- **Aquatic invertebrates**
  - NOEC/NOEL expected to be \(>0.1 - \leq 1.0 \text{ mg/l}\) (based on modeled data)

Persistence and degradability
- Readily biodegradable.
- Oxidizes rapidly by photo-chemical reactions in air.

Bioaccumulative potential
- Has potential to bioaccumulate.

Mobility
- Adsorbs to soil and has low mobility. Floats on water.

13. DISPOSAL CONSIDERATIONS

**Material Disposal**
- Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Do not dispose into the environment, in drains or in water courses. Waste product should not be allowed to contaminate soil or water.

**Container Disposal**
- Drain container thoroughly. After draining, vent in a safe place away from sparks and fire. Residues may cause an explosion hazard. Do not, puncture, cut, or weld uncleaned drums. Send to drum recoverer or metal reclaimer.

**Local Legislation**
- Disposal should be in accordance with applicable regional, national, and local laws and regulations. Local regulations may be more stringent than regional or national requirements and must be complied with.

14. TRANSPORT INFORMATION

**Land (as per ADR classification):** Regulated
Material Safety Data Sheet

Class : 9
Packing group : III
Hazard identification no. : 90
UN No. : 3082
Danger label (primary risk) : 9
Proper shipping name : ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S.
Environmentally hazardous : Yes

IMDG
Identification number : UN 3082
Proper shipping name : ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S.
Class / Division : 9
Packing group : III
Marine pollutant : Yes

IATA (Country variations may apply)
UN no. : 3082
Proper shipping name : ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S.
Class / Division : 9
Packing group : III

SEA (Annex II of MARPOL 73/78 and the IBC code)
Pollution category : Annex I
Ship type : 2
Product name : Aromatic naphtha (having less than 10% benzene)
Special precaution : Refer to chapter 7, Handling & storage for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

15. REGULATORY INFORMATION

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Chemical Inventory Status
